Elsevier Scientific Publishers Ireland Ltd.

TOXICOLOGY

SUBJECT INDEX

Volume 68 (1991)

adenosine agonist, diphenylethyladenosine, preclinical safety studies, 21
antidote, colchicine, colchicine-specific Fab fragments, colchicine poisoning, passive immunization, 121
aroclor 1254, carcinogenesis, DNA synthesis, I-compounds, polychlorinated biphenyls, tumor promotion, 275
atherosclerosis, endothelial cells, glycosaminoglycans, heparan sulfate, lead, thrombosis, 249

benzene, dichloromethane, carboxyhemoglobin, toluene, xylenes, metabolism, 89
1,2-benzenediol myeloperoxidase, nordihydroguaiaretic acid, erythrocyte, haemolysis, methaemoglobin, 37
benzo[*a*]pyrene, solvent, toluene, pulmonary cytochrome *P*-450, phospholipid, membrane fluidity, 75
benzo[*a*]pyrene, superoxide anion radical, superoxide-generating system, 259
bile salt-independent bile flow impairment, streptozotocin-induced hepatotoxicity, biliary electrolyte excretion, Na^+,K^+-adenosine triphosphatase activity, 207
biliary electrolyte excretion, streptozotocin-induced hepatotoxicity, bile salt-independent bile flow impairment, Na^+,K^+-adenosine triphosphatase activity, 207

Ca^+channel blockers, Ca^{2+} channels, MRI agents, manganese (II) bis(glycinate)dichloride, cardiotoxicity, 63
Ca^{2+} channels, Ca^+ channel blockers, MRI agents, manganese (II) bis(glycinate)dichloride, cardiotoxicity, 63
cadmium, tissue distribution, excretion, sodium *N*-benzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-carboxybenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-methoxybenzyl-D-glucamine dithiocarbamate, chelating effect, 157
cadmium, zinc deficiency, stearoyl-CoA desaturase, 133
carboxyhemoglobin, dichloromethane, benzene, toluene, xylenes, metabolism, 89
carcinogenesis, aroclor 1254, DNA synthesis, I-compounds, polychlorinated biphenyls, tumor promotion, 275
cardiotoxicity, Ca^+ channel blockers, Ca^{2+} channels, MRI agents, manganese (II) bis(glycinate)dichloride, 63
casein, lipopolysaccharide, dexamethasone, zinc, intranucleosomal fragmentation of DNA, inbred mice, 327
chelating effect, cadmium, tissue distribution, excretion, sodium *N*-benzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-carboxybenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-methoxybenzyl-D-glucamine dithiocarbamate, 157
chlorpyrifos, *O*,*O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothionate, fenitrothion, *O*, *O*-dimethyl *O*-(3-methyl-4-nitrophenyl) phosphorothionate, organophosphorus metabolism, 1
chlorpyrifos, organophosphate, developmental, cholinesterase inhibition, parathion, methyl parathion, 51
cholinesterase inhibition, organophosphate, developmental, parathion, methyl parathion, chlorpyrifos, 51
CHO cells, 2,4-dichlorophenoxyacetic acid, polyamines, 109
cis-diamminedichloroplatinum(II), cisplatin, nephrotoxicity, renal protective agents, 227
cisplatin, nephrotoxicity, renal protective agents, *cis*-diamminedichloroplatinum(II), 227
colchicine, colchicine-specific Fab fragments, antidote, colchicine poisoning, passive immunization, 121
colchicine-specific Fab fragments, colchicine, antidote, colchicine poisoning, passive immunization, 121

colchicine poisoning, colchicine, colchicine-specific Fab fragments, antidote, passive immunization, 121
conjugates, glutathione, nephrotoxicity, succinimides, 307

developmental, organophosphate, cholinesterase inhibition, parathion, methyl parathion, chlorpyrifos, 51
dexamethasone, lipopolysaccharide, casein, zinc, intranucleosomal fragmentation of DNA, inbred mice, 327
dichloromethane, carboxyhemoglobin, benzene, toluene, xylenes, metabolism, 89
2,4-dichlorophenoxyacetic acid, polyamines, CHO cells, 109
1,2 dichloropropane , pharmacokinetics, metabolism, F344 rats, 291
diphenylethyladenosine, adenosine agonist, preclinical safety studies, 21
DNA synthesis, aroclor 1254, carcinogenesis, I-compounds, polychlorinated biphenyls, tumor promotion, 275

endothelial cells, atherosclerosis, glycosaminoglycans, heparan sulfate, lead, thrombosis, 249
endothelial cells, fibroblasts, proliferation, rhodamine B, smooth muscle cells, 11
erythrocyte, myeloperoxidase, 1,2-benzenediol, nordihydroguaiaretic acid, haemolysis, methaemoglobin, 37
ethanol, ethyl carbamate, lung adenomas, interaction, 195
ethyl carbamate, lung adenomas, ethanol, interaction, 195
excretion, cadmium, tissue distribution, sodium *N*-benzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-carboxybenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-methoxybenzyl-D-glucamine dithiocarbamate, 157 chelating effect, 157

F344 rats, 1,2 dichloropropane, pharmacokinetics, metabolism, 291
fenitrothion, chlorpyrifos, *O*,*O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothionate, fenitrothion, *O*,*O*-dimethyl *O*-(3-methyl-4-nitrophenyl) phosphorothionate, organophosphorus metabolism, 1
fibroblasts, endothelial cells, proliferation, rhodamine B, smooth muscle cells, 11

glutathione, conjugates, nephrotoxicity, succinimides, 307
glycosaminoglycans, atherosclerosis, endothelial cells, heparan sulfate, lead, thrombosis, 249
growth factor, pituitary, lead, receptor, growth hormone releasing factor, thyroid releasing hormone, 169
growth hormone releasing factor, pituitary, lead, receptor, thyroid releasing hormone, growth factor, 169

haemolysis, myeloperoxidase, 1,2-benzenediol, nordihydroguaiaretic acid, erythrocyte, methaemoglobin, 37
heparan sulfate, atherosclerosis, endothelial cells, glycosaminoglycans, lead, thrombosis, 249
hepatotoxicity, metabolism, *N*-methylcarbazole, primary cultured rat hepatocytes, 217

I-compounds, aroclor 1254, carcinogenesis, DNA synthesis, polychlorinated biphenyls, tumor promotion, 275
immunotoxicity, linoleic acid anilide, toxic oil syndrome, 143
inbred mice, lipopolysaccharide, dexamethasone, casein, zinc, intranucleosomal fragmentation of DNA, 327
interaction, ethyl carbamate, lung adenomas, ethanol, 195
intranucleosomal fragmentation of DNA, lipopolysaccharide, dexamethasone, casein, zinc, inbred mice, 327

lead, atherosclerosis, endothelial cells, glycosaminoglycans, heparan sulfate, thrombosis, 249
lead, pituitary, receptor, growth hormone releasing factor, thyroid releasing hormone, growth factor, 169
linoleic acid anilide, immunotoxicity, toxic oil syndrome, 143
lipopolysaccharide, dexamethasone, casein, zinc, intranucleosomal fragmentation of DNA, inbred mice, 327
lung adenomas, ethyl carbamate, ethanol, interaction, 195

manganese (II) bis(glycinate)dichloride, Ca^+ channel blockers, Ca^{2+} channels, MRI agents, cardiotoxicity, 63
membrane fluidity, solvent, toluene, benzo[*a*]pyrene, pulmonary cytochrome *P*-450, phospholipid, 75
metabolism, dichloromethane, carboxyhemoglobin, benzene, toluene, xylenes, 89
metabolism, 1,2 dichloropropane, pharmacokinetics, F344 rats, 291

metabolism, hepatotoxicity, *N*-methylcarbazole, primary cultured rat hepatocytes, 217
methaemoglobin, myeloperoxidase, 1,2-benzenediol, nordihydroguaiaretic acid, erythrocyte, haemolysis, 37
methyl parathion, organophosphate, developmental, cholinesterase inhibition, parathion, chlorpyrifos, 51
microsomal metabolism, thiaarenes, S-oxidation, ring-oxidation, sulfoxides, sulfones, 181
MRI agents, Ca^{+} channel blockers, Ca^{2+} channels, manganese (II) bis(glycinate)dichloride, cardiotoxicity, 63
myeloperoxidase, 1,2-benzenediol, nordihydroguaiaretic acid, erythrocyte, haemolysis, methaemoglobin, 37

N-methylcarbazole, metabolism, hepatotoxicity, primary cultured rat hepatocytes, 217
Na^{+},K^{+}-adenosine triphosphatase activity, streptozotocin-induced hepatotoxicity, bile salt-independent bile flow impairment, biliary electrolyte excretion, 207
nephrotoxicity, cisplatin, renal protective agents, *cis*-diamminedichloroplatinum(II), 227
nephrotoxicity, glutathione, conjugates, succinimides, 307
nordihydroguaiaretic acid, myeloperoxidase, 1,2-benzenediol, erythrocyte, haemolysis, methaemoglobin, 37

O,*O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothionate, fenitrothion, *O*,*O*-dimethyl *O*-(3-methyl-4-nitrophenyl) phosphorothionate, organophosphorus metabolism, 1
O,*O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothionate, fenitrothion, *O*,*O*-dimethyl *O*-(3-methyl-4-nitrophenyl) phosphorothionate, organophosphorus metabolism, 1
organophosphate, developmental, cholinesterase inhibition, parathion, methyl parathion, chlorpyrifos, 51
organophosphorus metabolism, chlorpyrifos, *O*,*O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothionate, fenitrothion, *O*,*O*-dimethyl *O*-(3-methyl-4-nitrophenyl) phosphorothionate, 1

parathion, organophosphate, developmental, cholinesterase inhibition, methyl parathion, chlorpyrifos, 51
passive immunization, colchicine, colchicine-specific Fab fragments, antidote, colchicine poisoning, 121
pharmacokinetics, 1,2 dichloropropane, metabolism, F344 rats, 291
phospholipid, solvent, toluene, benzo[*a*]pyrene, pulmonary cytochrome *P*-450, membrane fluidity, 75
pituitary, lead, receptor, growth hormone releasing factor, thyroid releasing hormone, growth factor, 169
polyamines, 2,4-dichlorophenoxyacetic acid, CHO cells, 109
polychlorinated biphenyls, aroclor 1254, carcinogenesis, DNA synthesis, I-compounds, tumor promotion, 275
preclinical safety studies, adenosine agonist, diphenylethyladenosine, 21
primary cultured rat hepatocytes, metabolism, hepatotoxicity, *N*-methylcarbazole, 217
proliferation, endothelial cells, fibroblasts, rhodamine B, smooth muscle cells, 11
pulmonary cytochrome *P*-450, solvent, toluene, benzo[*a*]pyrene, phospholipid, membrane fluidity, 75

receptor, pituitary, lead, growth hormone releasing factor, thyroid releasing hormone, growth factor, 169
renal protective agents, cisplatin, nephrotoxicity, *cis*-diamminedichloroplatinum(II), 227
rhodamine B, endothelial cells, fibroblasts, proliferation, smooth muscle cells, 11
ring-oxidation, thiaarenes, microsomal metabolism, S-oxidation, sulfoxides, sulfones, 181

S-oxidation, thiaarenes, microsomal metabolism, ring-oxidation, sulfoxides, sulfones, 181
smooth muscle cells, endothelial cells, fibroblasts, proliferation, rhodamine B, 11
sodium *N*-benzyl-D-glucamine dithiocarbamate, cadmium, tissue distribution, excretion, sodium *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-carboxybenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-methoxybenzyl-D-glucamine dithiocarbamate, chelating effect, 157
sodium *N*-*p*-carboxybenzyl-D-glucamine dithiocarbamate, cadmium, tissue distribution, excretion, sodium *N*-benzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-methoxybenzyl-D-glucamine dithiocarbamate, chelating effect, 157
sodium *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, cadmium, tissue distribution, excretion, sodium *N*-benzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-carboxybenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-methoxybenzyl-D-glucamine dithiocarbamate, chelating effect, 157

solvent, toluene, benzo[*a*]pyrene, pulmonary cytochrome *P*-450, phospholipid, membrane fluidity, 75
stearoyl-CoA desaturase, cadmium, zinc deficiency, 133
streptozotocin-induced hepatotoxicity, bile salt-independent bile flow impairment, biliary electrolyte excretion, Na^+,K^+-adenosine triphosphatase activity, 207
succinimides, glutathione, conjugates, nephrotoxicity, 307
sulfones, thiaarenes, microsomal metabolism, S-oxidation, ring-oxidation, sulfoxides, 181
sulfoxides, thiaarenes, microsomal metabolism, S-oxidation, ring-oxidation, sulfones, 181
superoxide-generating system, superoxide anion radical, benzo[*a*]pyrene, 259
superoxide anion radical, benzo[*a*]pyrene, superoxide-generating system, 259

thiaarenes, microsomal metabolism, S-oxidation, ring-oxidation, sulfoxides, sulfones, 181
thrombosis, atherosclerosis, endothelial cells, glycosaminoglycans, heparan sulfate, lead, 249
thyroid releasing hormone, pituitary, lead, receptor, growth hormone releasing factor, growth factor, 169
tissue distribution, cadmium, excretion, sodium *N*-benzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, sodium *N*-*p*-carboxybenzyl-D-glucamine sodium *N*-*p*-methoxybenzyl-D-glucamine dithiocarbamate, chelating effect, 157
toluene, dichloromethane, carboxyhemoglobin, benzene, xylenes, metabolism, 89
toluene, solvent, benzo[*a*]pyrene, pulmonary cytochrome *P*-450, phospholipid, membrane fluidity, 75
toxic oil syndrome, linoleic acid anilide, immunotoxicity, 143
tumor promotion, aroclor 1254, carcinogenesis, DNA synthesis, I-compounds, polychlorinated biphenyls, 275

xylenes, dichloromethane, carboxyhemoglobin, benzene, toluene, metabolism, 89

zinc, lipopolysaccharide, dexamethasone, casein, intranucleosomal fragmentation of DNA, inbred mice, 327
zinc deficiency, cadmium, stearoyl-CoA desaturase, 133

Toxicology, 68 (1991) 353
